**2:15: Global Impacts on City and
Culture versus Resilient City
Planning —Richard Balfour, Balfour
Architects and Vancouver Metro
Planning Council**

**4:15: Closing Session and Farewells

The purpose of this series of workshops is to bring public officials and administrative and planning personnel together with members of community environmental and land-use/controlled growth alliances to discuss with Vancouver, B.C. resource people the methods, techniques, and lessons for livability and towards sustainability that has become the hallmark of the “Vancouver achievement” that might be adapted to Lexington and the Bluegrass.

This two-day event hopes to continue the conversations begun at the “Lexington and the future of Planning in the Bluegrass” Conference, held March 30-31, 2007 at the Kentucky Horse Park. This program also complements the Bluegrass Tomorrow InnoVISION project currently under way.

Thanks to the Planning Committee: Eric Paul Marr; Knox van Nagell; Tom Martin; and Rob Rumpke.
