1. **Are you in support of, or in opposition to, continuing funding for the Purchase of Development Rights program? Why do you support or oppose funding for this program?**

- I support PDR. In a post oil economy, regional sustainment will be increasingly important as global logistics diminish. The community will need our vital farmland.

2. **Do you support or oppose tax breaks and/or other incentives for infill-redevelopment projects?**

- I support tax breaks for infill redevelopment- as both an incentive and to offset the expense of loans from banks that do not cooperate with such projects.

3. **Do you feel that a higher priority should be placed on addressing and solving the sanitary sewer, storm water and water quality problems in Fayette County before there is any further expansion of development beyond the current urban services area? Why or Why not?**

- Absolutely. Our capacity will continue to be overturned and undermined by further expansion. I favor an ordinance that will insure that infrastructure has more than ample capacity before an additional development breaks ground.

4. **Fayette County agri-business and agri-tourism generate over \$3 billion dollars for the regional economy each year. Do you support these industries? If so, how will you promote agribusiness and agri-tourism if elected to office?**

- Yes. In a post-peak oil world-agribusiness and tourism only has greater investment promise. I will encourage and seek to initiate programs that will help utilize our farmland in a manner that is consistent with supply needs.

5. **Fayette County currently has enough vacant land within the urban services area to support nine years of residential growth. Will you propose to use this available land to provide affordable housing, accessible transportation, and amenities for our growing community? If so, how?**

- Yes, by working in coalition with my fellow councilmen, and in concert with those Lexington neighborhoods in association with those professionals that are actually concerned with community improvement more so than motivated purely by profit.
